

ABOUT MINING EVENTS

Romano staff and management.

Romano ready to offer quality service

Romano Projects and Trading in Steelport are leaders in the field of high-density polyethylene (HDPE) pipes, dam linings, grass cutting, tree felling, bee removal, plumbing and drain unblocking. The company was established in 2006 and is a Level 1 B-BBEE contributor and is a 100% black-owned company. Romano is a multifaceted organisation, employing more than fifty people. The company has been modelled and steered to success by the Glencore Local Supplier Development programme. "We initially specialised in soft services provision, but we have since diversified and have grown into the HDPE piping and drain

maintenance services. Romano is owned by a young professional with firm technical expertise in the mining industry which puts the company in a competitive space. Romano continues to offer services to Glencore and will be forever grateful for the opportunities afforded by Glencore." said Nhlanhla Mbuyane, office administrator. Nene Marebane, company director, indicated that Romano is looking at expanding their footprint in Fetakgomo, Tubatse and Sekhukhune districts. The aim is to ultimately increase employment opportunities for local residents. The company also does the installation and fabrication of HDPE bends, tee pieces, laterals

and reducers, plastic pipes, dam linings and sheet welding. Its welding methods include butt welding, electrofusion, hot air, socket, and extrusion welding. They offer domestic and industrial garden maintenance services. It includes bush clearing, tree felling, removal of alien species, weeding, pruning, and trimming. Visit them at Unit B10B in the Steelport Mining Supply Park, business hours are weekdays between 07:00 and 16:00. Romano can be contacted for callouts and is always on standby. Phone: 013 692 4706/072 368 8238 or email admin@romanoprojects.co.za. Alternatively, visit their website www.romanoprojects.co.za.

Probe IMT is the solution for your business

The business philosophy of Probe IMT is dedicated to earning the trust of customers through excellent client service and encouraging employees to reach their full potential, which will ultimately improve their standard of living. The business is built on listening to the needs of its customers and the team. As a company, they challenge themselves to think objectively and to continuously improve their business through better ideas. Working as a team is core to the success of their organisation. Teamwork makes the dream work. Probe IMT is proud to associate with leaders in integrated solutions for productivity and safety. Orizen is the partner in a

range of electric and battery-powered vehicles, specifically designed to fit the customer's needs. Sinetech is a partner in everything solar-related. It is a specialist in the supply and installation of PV solar power systems, UPS systems, DC and AC power, backup systems, solar components, and inverters. The MaxLi ranges offer new and improved battery chargers with a five-year warranty from 12V to 24V. M3SH is the underground safety system that offers dust monitoring, noise monitoring, environmental monitoring systems, as well as Level 9 PDS. For more information on products and solutions, contact Jaco Brits on 079 897 4091 or visit www.probeimt.co.za.
